

Corma Vacuum Forming Corrugators

MODEL
130
SERIES

MODEL 130
FOR PIPE SIZES:
0.25 inches I.D. to
4.5 inches O.D.
(6 mm I.D. to
110 mm O.D.)

Some of the advantages of Corma Corrugators that have made the Model 130 series a best seller, the world over:

Corma offers standard systems capable of producing pipes of virtually all sizes, from extremely small pipes with inside diameter measuring as little as 1 mm (0.040 in.) to enormous pipes with outside diameters measuring as much as 3000 mm (120 in.).

Corma supplies Single Wall, Double Wall, Triple Wall, Rib Pipe, Ultra Rib, and Corma Solid Wall Pipe production systems as complete turnkey installations or as individual components.

- Corma corrugators feature very strong and precise construction, able to withstand the rigorous demands of day to day production. All Corma corrugators are backed by a three year mechanical warranty.
- Corma corrugators are of vertical construction. This design is extremely user friendly and has been proven for over 45 years. The top and bottom housings are held in place by four columns which keep the machine in perfect alignment. With the centre height adjustment, each Corma corrugator can make a very large range of pipe sizes; providing production flexibility at lower capital investment.
- Corma corrugators accept almost all blow and vacuum formable materials including PVC, PE, PP, Nylon, TPR, Teflon and others. Modifiers such as flame retardants, EVA etc. can be added.
- Corma corrugators are available in either blow molding or vacuum forming designs.
- Corma corrugators are manufactured under strict ISO 9001 -2015 procedures to meet customers' requirements and bear the CE stamp of conformity to the European technical and safety standard.
